Participant licenses
ParticipantMasterSmartPolicy
① mint: issuer
⑤ transfer: buyer qualified
ParticipantNMT
ERC-721
① creates
④ transfers A → B
ParticipantMutableAsset
SpecialCarrier license
⑥ on transfer: name,
profile := 0,
holder policy := address(0)
③ participantTypeOf
ChoreographyParticipantAM
③ type of the license
② role Special Carrier = license
CreatorSmartPolicy
authorizes and constrains updates
HolderSmartPolicy
second approval
ChoreographyMutableAsset
creates and owns
MasterSmartPolicy
authorizes mint
ChoreographyNMT
ERC-721
tokenURI
ChoreographyTokenURIRenderer
reads
immutable
Model contract
SSTORE2
read at mint
setRoles + setNodes on the asset
(② links the license)
reads tokenURI: JSON
(roles + nodes)
① mintWithParticipantType
④ transferFrom(A, B)
Off-chain · JavaScript and actors
deploys the model contract
